

Questionnaire Help Sheet or Project Comment Card

Do you need to own land, or own land within the project area, to complete this form? NO

1. Which Open House did you attend?

- August 4, 2025 – Uvalde County (Example: “Uvalde County – local venue”)
- August 5, 2025 – Bandera County
- August 6, 2025 – Edwards County
- August 7, 2025 – Val Verde County
- OR fill out N/A

2. Do you understand the need for the project?

Yes Option:

Due to the tricky nature of this question, we encourage a NO answer. We do not know how CPS will use this part of the question to form there decisions.

No Option:

- Example - “No, I believe there are alternative solutions such as upgrading existing lines or using different routing that would meet reliability goals with less impact.”

3. Was the information informative?

Yes Option:

- “Yes, but additional details on environmental impact studies and route alternatives would be helpful.”

No Option:

- “No, critical details about property impact, alternative routes, and mitigation measures were missing or unclear.”

4. Identify Features Not on the Constraints Map. .We will not have a constraints map

PLEASE USE EXAMPLE LIST ATTACHED TO JOG YOUR MEMORY:

- When filling this out, the goal is to document anything physical, environmental, historical, or operational on or near your property that could influence routing. The more specifics you provide, the stronger the case for rerouting. This is the most important section:

House, Shed, or Other Structures

- ☐ Primary residence within 250 feet of proposed corridor
- ☐ Guest house and detached garage
- ☐ Equipment barn and hay storage shed
- ☐ Workshop with electrical service
- ☐ Metal storage building used for ranch operations
- ☐ Livestock shelter and tack room

Springs, Streams, Wetlands, Sensitive Species, or Protected Areas

- ☐ Year-round spring feeding into a tributary
- ☐ Seasonal creek with riparian vegetation
- ☐ Wetland area hosting migratory birds, or any other seasonal migration species that visit your property
- ☐ Habitat for golden-cheeked warbler, black capped vireo, or any other endangered or threatened species,
- ☐ Stock pond supporting fish and amphibians
- ☐ Artesian spring with historical use

Cave, Sinkhole, or Mine

- ☐ Limestone sinkhole approximately 15 feet deep
- ☐ Known cave entrance used by bats
- ☐ Old hand-dug well partially collapsed
- ☐ Abandoned gravel pit
- ☐ Historical mine shaft from early 1900s

Approved or Documented Planned Project

- ☐ County-approved subdivision with recorded plat
- ☐ Planned road widening project
- ☐ Approved utility line extension
- ☐ Documented fence replacement project
- ☐ Planned solar installation site

Existing Conservation Easement

- ☐ 80-acre conservation easement held by Texas Land Trust
- ☐ Land in Wildlife Management Plan
- ☐ Riparian habitat protection easement
- ☐ Conservation buffer zone for state park
- ☐ USFWS grassland restoration easement

Historical/Archaeological Feature

- ☐ Original 1880s stone ranch house
- ☐ Pioneer-era windmill and cistern
- ☐ Native American artifact site
- ☐ Family cemetery or graves
- ☐ Historic cattle drive trail crossing

Underground Utilities or Pipelines

- ☐ Buried gas transmission line
- ☐ Rural water supply line
- ☐ Fiber optic cable
- ☐ Private irrigation pipeline
- ☐ Abandoned oil well casing

Agricultural Features

- ☐ Pivot irrigation system
- ☐ Cattle or other livestock handling pens
- ☐ Rotational grazing fencing
- ☐ Irrigation ditch for crops
- ☐ Terracing for erosion control

Other Land Use

- ☐ Private grass airstrip
- ☐ Old capped landfill site
- ☐ Public Park, HOA common area.
- ☐ Private Property Recreational Area

- ☐ Wildlife/Natural Preserves NOT open to public
- ☐ Buried debris from past construction
- ☐ Radio tower with guy wires
- ☐ Cellular antenna installation

Additional Comments

- ☐ Recommend rerouting along existing utility corridors
- ☐ Concern about EMF exposure to residents
- ☐ Potential property value decrease
- ☐ Risk to wildlife migration routes
- ☐ Avoid impacting water sources and historical structures

5. Ranking factors (1 = not important, 5 = very important)

- Apply the rank that describes your opinion about the project as a whole in the entire region, not just your specific property

6. Links or features on/near property and concerns:

- “Line segment XYZ passes within 500 feet of our residence, impacting property value and safety.”
- “Proposed route crosses family ranch used for livestock and wildlife management.”
- “Transmission line would fragment grazing pastures and disrupt water pipeline systems.”
- “Hunting leases, exotic game business, hunting will be ruined”
- “Outing through our county would negatively affect views in this area that depends heavily on natural tourism for our economy”
- “This route will negatively impact real estate values throughout our area”
- “Large transmission line and easement will increase wildfire risks in the region”

7. Additional comments:

- “Recommend re-routing along existing utility corridors, highways to reduce new land disturbance.”
- “Request full environmental review and mitigation for affected landowners.”
- “Line should avoid ecologically sensitive areas and historic properties.”
